Who we are

Solarhub Technology Ltd. is a Bangladeshi renewable-energy company delivering rooftop solar power to industrial and institutional clients under the **OPEX (zero-capital) model**, in which Solarhub funds, designs, installs, and operates the solar system, and the client pays only for the power consumed, at a discount to the grid tariff.

The company operates under Bangladesh's **Renewable Energy Policy 2025** and the **SREDA Net Metering Guideline 2025**, structuring tripartite agreements between the power producer, the off-taker, and the relevant distribution utility.

THE OPEX MODEL, IN ONE LINE

Fund > Design > Install > Operate

We carry the capital and the risk. The client pays only for the clean power they use, always below the grid tariff.

What drives us

👁 VISION

To make clean, self-generated solar power the default choice for Bangladesh's industry: cutting energy costs and carbon without asking clients to invest a single taka in capital.

📌 MISSION

To fund, engineer, install, and operate rooftop solar under transparent tripartite agreements, so partners pay only for the clean power they use, reliably and below the grid tariff.

CORE VALUES

Zero-capital partnership

We carry the investment so clients never have to.

Engineering discipline

Every plant is designed, built and tested to standard.

Regulatory rigor

Full compliance with RE Policy and SREDA guidelines.

Long-term operation

We run and maintain what we build, for the full term.

Transparency

Clear tariffs, clear metering, clear agreements.

Sustainability

Measurable carbon avoidance on every rooftop.

Board & leadership

CHAIRMAN

Dewan Ali Kabir

Managing Director of Master Simex Paper Limited, an ISO 9001:2015-certified specialty paper manufacturer and part of Emerging Group Bangladesh, established in 2002. Under his leadership Master Simex has grown into one of the country's leading paper converting and printing businesses: three production facilities (Narsingdi, Narayanganj, Gazipur), over 600 people, annual throughput exceeding 25,000 MT, and a supply chain spanning 100+ partners across 20 countries.

His experience in large-scale, security-sensitive document manufacturing, including national examination OMR sheets and bank SWIFT papers, with a 95% client-retention rate, strengthens the company's financial capacity and credibility for government and defence-related procurement.

DIRECTOR

Md. Sazzad Amin

Retired Marine Engineer and Founder & Group Chairman of Peak Apparels Ltd. and its sister concerns, including Peak Trading. Over 35 years of versatile business experience across garments manufacturing, IT infrastructure and software development (in Bangladesh and abroad), real estate development in Canada and Bangladesh, procurement and supply, chemical production for the garments industry, and housing materials.

Founder and lead management figure behind BABL, Peak Polymer Ltd., Tripak and other Group companies, which have partnered with internationally renowned brands in apparel, with Huawei in IT, and with Polytech in building construction materials.

MANAGING DIRECTOR

Muhammad Abu Hasan

Mr. Hasan is a Chief Engineer with more than 30 years of experience in the marine industry and is actively involved in marine-related business and technical operations.

Chief Engineer (Marine)

30+ years

DIRECTOR · CEO

Mohammad Nasimul Huq

Mr. Nasimul is a Chief Engineer (Marine) and a graduate of Bangladesh Marine Academy, Jaldia, Chittagong. He is currently serving as Chief Engineer on foreign-going vessels and possesses extensive experience in marine engineering and technical management.

Signed the Khulna Shipyard tripartite agreement as Chief Executive Officer, representing Solarhub Technology Ltd. as Power Producer.

The case for Solarhub

We combine capital, engineering, and regulatory expertise so our clients get clean power with none of the cost, risk, or complexity of owning a solar plant.

Zero capital outlay

Solarhub funds the entire system. Clients invest nothing and own no equipment risk.

Power below tariff

Clients pay only for power consumed, at a discount to the grid tariff, saving from day one.

In-house engineering

Turnkey EPC capability: design, procurement, installation and commissioning under one roof.

100% funded by us

Regulatory expertise

Tripartite agreements structured under RE Policy 2025 and the SREDA Net Metering Guideline 2025.

Up to 18% off-peak

Backed by industry

Leadership drawn from established groups, Master Simex Paper and Peak Apparels, anchoring financial strength.

Single accountable partner

Proven flagship

A signed, in-construction 1.788 MWp project with Khulna Shipyard, a Bangladesh Navy installation.

Fully compliant

600+ staff heritage

Navy-grade delivery

No capital. No risk. Just cleaner power at a lower cost.

The tripartite OPEX model

Every project is structured as a tripartite Power Purchase Agreement between three parties, under the net-metering framework.

HOW IT WORKS

01 Solarhub invests We fund and build the plant on the client's roof at no cost to them.	02 System generates Clean solar power is produced and consumed on site during the day.	03 Client pays per unit The client pays only for what it uses, at a discount to the grid tariff.	04 Surplus net-metered Excess energy is exported to the grid and credited via net metering.

What we deliver

 01 EPC Turnkey engineering, procurement and construction of rooftop solar plants. Design · Procure · Build · Test	 02 OPEX Solar Zero-capital model: we own and operate; you pay only for power used, below tariff. We own · You save · No capital	 03 CAPEX Solar Client-owned systems for organisations that prefer to invest directly. You own · We build · You run
 04 Net Metering Grid interconnection and net metering under the SREDA Guideline 2025. Interconnect · Bi-directional	 05 O & M Operation, monitoring and maintenance keeping generation at peak across the term. Monitor · Clean · Repair	 06 Consultancy Feasibility, energy audits, financial modelling and regulatory advisory. Feasibility · Audit · Advisory

Every service, available under OPEX or CAPEX.

One accountable partner, from feasibility through decades of operation.

Who we power

Solarhub targets energy-intensive industrial and institutional rooftops, with particular strength in government and defence-linked procurement.

Government

Offices, agencies and public facilities

Defence

Naval & defence installations

Manufacturing

Factories and heavy industry

Textile & RMG

Mills, dyeing and garment units

Commercial

Malls, offices and retail

Healthcare

Hospitals and clinics

Education

Universities, schools and
campuses

Ports & Logistics

Ports, depots and warehouses

From roof to running plant

1

Consultation

Understand the client's load profile, roof, and savings goals; agree the commercial model and tariff.

2

Survey

Structural, electrical and shading assessment carried out on site.

3

Design

System sizing, single-line design and energy-yield modelling.

4

Installation

Mounting, module and inverter installation to standard, HSE-first.

5

Commissioning

Grid interconnection, net-meter setup and full performance testing.

6

Maintenance

Monitoring, cleaning and preventive O&M across the full agreement term.

Navy-grade

DELIVERY STANDARD

Built on proven technology

We specify tier-one, internationally certified equipment per project, with brand selections finalised at the design stage to match each site.

Solar PV Modules

Tier-1, IEC-certified PV modules.

✓ Tier-1, IEC-certified

Inverters

String / central inverters with grid support.

✓ Grid-tied, SREDA-approved

Battery Storage

Optional lithium storage for resilience.

✓ Optional, sized per site

Monitoring & SCADA

Real-time generation monitoring & alerts.

✓ Remote performance monitoring

Mounting Structures

Corrosion-resistant roof mounting systems.

✓ Corrosion-resistant

Metering

Bi-directional net-metering equipment.

✓ Bi-directional net meter

Part of a proven group

Solarhub is the renewable-energy arm of an established industrial group spanning garments, paper, construction, real estate and chemicals. That heritage gives the company financial strength, procurement scale and operational discipline from day one.

5 SISTER COMPANIES	5 INDUSTRY SECTORS	ISO 9001 CERTIFIED MANUFACTURING	20+ yrs INDUSTRIAL HERITAGE

GROUP & SISTER CONCERNS

 Peak Apparels Ltd. GARMENTS · EST. 2001 100% export-oriented knit & woven manufacturer. A 42,000 sq ft facility, around 550 staff and 275 machines from Japan & Taiwan; GOTS and international social-compliance certified.	 Master Simex Paper Ltd. SPECIALTY PAPER · ISO 9001:2015 600+ staff across three facilities, 25,000+ MT a year and 95% client retention. Produces secure government OMR sheets and bank SWIFT papers with solar-powered production.	 Peak Polymer Ltd. PVC ROOFING MANUFACTURER Manufacturer of PVC industrial roofing sheet with a strong presence in the local market, using a technologically advanced process to produce EuroRoof®.
 Tripax Homes Ltd. REAL ESTATE & CONSTRUCTION Real-estate developer with completed projects in Gulshan and Uttara, currently delivering developments within the Jalshiri Housing Project.	 Alternate Chemical Industry Ltd. STARCH & SWEETENERS Operates a factory in Habiganj producing starch and sweeteners for local clients, with plans to manufacture pharmaceutical-grade starch.	

Where we're headed

Armed Police Battalion (APBn)

IN NEGOTIATION

Rooftop solar engagement under discussion for facilities nationwide.

Bangladesh Coast Guard

IN NEGOTIATION

Rooftop solar engagement under discussion for coastal bases.

Mongla Port Authority

IN NEGOTIATION

Rooftop solar engagement under discussion for port infrastructure.

What we pursue

- ✓ Large industrial and institutional rooftops
- ✓ Creditworthy, long-horizon off-takers
- ✓ Government and defence-linked institutions
- ✓ Power purchase terms tailored to the customer

Put your roof to work. Zero capital, zero risk.

Everything you need to switch to cleaner, cheaper power, delivered and operated by a single accountable partner.
